Consulting public courses

- User can now consult a public course without logout.

 [Enrol on a new course](#) |  [Remove course enrolment](#) |  [All platform courses](#)

IMS QTI

- Standard for Exercises
- Export was present in 1.7
- Import from other software is now possible

Managing languages

- Refactoring of traduction scripts
 - `$langDelete = "Supprimer" -> $_lang['Announcement has been deleted'] = 'L\'annonce a été supprimée';`
 - `$langDelete -> get_lang('Announcement has been deleted')`

Managing languages

- Selection of available languages in the administration

Configuration
Main settings

Platform | Language | Technical contact | Institution | File

Platform language : english

Language to display :

- arabic
- brazilian
- bulgarian
- catalan
- croatian
- czech
- danish
- dutch
- english
- finnish
- french
- french_corp
- galician
- german
- greek
- hungarian
- indonesian
- italian

Managing languages

- Each user can select his language in his profile or in home page.

The screenshot shows a dropdown menu for language selection on the Claroline.net website. The menu is open, showing options for 'dutch', 'english', and 'french'. The 'english' option is currently selected. Below the dropdown, there is a text input field for a name, a password input field, and an 'Enter' button. At the bottom of the form, there are two links: 'Lost password' and 'Create user account'.

The screenshot shows the 'My User Account' profile page on the CVS Main website. The page title is 'My User Account'. The user's name is 'Laurent', and the first name is 'Mathieu'. The administrative code is empty. The language is set to 'english'. The user name is 'admin', and the password is masked with asterisks. The page also includes a note: 'Password twice to change, leave empty to keep it)'. The page is titled 'CVS Main > My User Account'.

Ical and Rss

- Ical and Rss are standards to exchange events between applications like Google Calendar or other portails

Group properties

- Each group can be deactivated
- All tools can be Private or Public

Groups
Groups settings

Registration
 Students are allowed to self-register in groups

Limit
A user can be a member of maximum groups

Access
 Private Public

 Forum
 Documents and Links
 Chat
 Wiki

Managing classes

- Actually, you can import a class in a course and then the link is broken.
- In 1.8, the link is saved so you can unsubscribe a class.
- This development is made by Damien Garros (Université de Lyon)
