

# Entering the platform

claroline.net

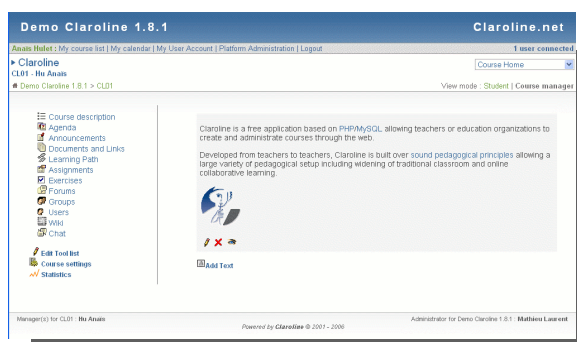

The platform home page is the entrance door to Claroline. In addition to the user's authentication functionalities, it displays a modifiable presentation area, the course list and a search engine.

**Manager and user profiles** (with specific given rights) can be defined according to the needs of the platform and the specificities of each course.

## Course home page

Each course is built on the basis of a main page, displaying a list of available tools and a description of the course. This page also gives the course manager access to the settings and statistics of the course.
